

PRESS RELEASE

Emory Cloud Backup Now Available for Trial and Purchase on SAP® App Center

By integrating with SAP HANA® and SAP Cloud Platform, SAP ASE service, Linke's Emory Cloud Backup enables customers to streamline the management of database backups on Amazon S3, the Amazon Web Services (AWS) storage service

Barcelona, 24th of June 2020. Linke today announced today that its [Emory Cloud Backup](#) solution is now available for trial and online purchase on [SAP® App Center](#), the digital marketplace for SAP partner offerings. The solution integrates with the SAP HANA® and SAP Cloud Platform, ASE service, to speed up and optimize database backups on AWS.

This integration makes Emory Cloud Backup an extension of the SAP HANA and SAP® Adaptive Server® Enterprise (SAP ASE) databases and takes advantage of SAP administration tools to manage the backup and recovery of databases stored in Amazon S3.

Businesses using SAP solutions will be able to back up their SAP HANA and SAP ASE databases at speeds up to 800 GB per hour, without incurring redundant costs for infrastructure. Additionally, Emory 1.0 - Cloud Backup for SAP HANA is SAP certified for integration with SAP HANA.

"We focus our research efforts on developments that help companies accelerate their migrations from SAP environments to the public cloud. Additionally, we help to enhance resource optimization, improve performance and reduce costs for systems operation and management in a short time," said Ricardo Casanovas, Chief Technology Officer at Linke.

At SAP App Center, businesses can discover approximately 1,500 innovative partner solutions that integrate with and extend SAP solutions. There, customers can find the SAP-validated partner apps they need to grow their business. Find, try, and buy SAP partner solutions digitally at www.sapappcenter.com.

Linke is an SAP partner in the SAP PartnerEdge® program. As such, it is empowered to build, market and sell software applications on top of market-leading technology platforms from SAP. The SAP PartnerEdge program provides the enablement tools, benefits and support to facilitate building high-quality, disruptive applications focused on specific business needs – quickly and cost-effectively. The program provides access to all relevant SAP technologies in one simple framework under a single, global contract.

About Linke

Founded in 2010 by a group of technical professionals, Linke is a company of experts, helping businesses migrate from SAP environments to the Amazon Web Services (AWS) platform. With this specialization, Linke helps its clients in Spain, Europe and the Middle East, to achieve the advantages of cloud computing in a simple and effective way.

The company has carried out 57 migrations from SAP systems to AWS and currently manages more than 350 SAP instances on the Amazon Web Services public cloud platform. Its specialization in both markets is evidenced by the fact that the company has 72 certifications, including certifications from AWS and SAP.

The company has opened a business unit specialized in artificial intelligence and the development of conversational interfaces for companies that want to take advantage of this technology to add differential value to their relationships with customers, employees, suppliers and partners.
