

PRESS RELEASE

## **Linke becomes now an Amazon Web Services Migration Acceleration Program Partner for SAP**

- **The Spanish company has achieved the Amazon Web Services Migration Acceleration Program Partner designation for SAP, which reinforces its position as a referent company in both environments.**
- **Being part of this program recognizes Linke as an AWS MAP Partner with the experience, methodology and resources needed to help companies bring their SAP systems to AWS.**
- **Already holding the SAP Competency designation, which certifies Linke as expert in moving SAP systems to AWS, they will now establish a migration factory to carry out these projects in a standardized and methodical way. The goal is for companies to quickly reach the benefits of the system and take advantage of their investments in cloud technology.**

**Barcelona, 22nd May 2020.** Linke has taken another step in its collaboration with Amazon Web Services (AWS), by achieving the AWS Migration Acceleration Program (MAP) Partner designation for SAP, which will allow them to add more value when companies migrate their SAP systems and workloads to AWS.

Being an AWS MAP Partner for SAP accredits Linke as an AWS Partner Network (APN) Premier Consulting Partner with the experience, methodology and resources needed to help companies bringing their SAP systems to AWS, offering them the route best suited their needs.

Being part of the AWS MAP for SAP program is a natural step in Linke's relationship with AWS, which will allow customers to simplify the migration of their SAP systems to the cloud. At this point, the creation of a migration factory stands out as an important step for Linke using the AWS SAP Migration Factory service, which facilitates a standardized approach to projects through a methodology and set of tools that speed up the deployment of different customer scenarios.

“This is further proof of our commitment to AWS and SAP, the areas in which we are specialists. Becoming an AWS MAP for SAP Partner is a guarantee to our customers that they will benefit from the agility, services and pace of innovation of the seamless cloud while driving its transformation”, said Ricardo Casanovas, Chief Technology Officer (CTO) at Linke.

Linke, a specialist in SAP cloud consulting services has been an APN Partner since 2012 and it has received three AWS Competencies designations in: SAP, DevOps and, most recently, Migrations, which accredits it as an APN Premier Consulting Partner with extensive experience in helping companies to move their systems to AWS and successfully undertake all the stages of such a project: discovery, planning, migration and operations.

### **About Linke**

Founded in 2010 by a group of technical professionals, Linke is an expert company migrating SAP environments to Amazon Web Services (AWS), specializations in which it helps its clients, mainly in Spain, Europe and the Middle East, to achieve the advantages of cloud computing in a real, effective and simple way.

The company has carried out 57 migrations from SAP systems to AWS and currently manages more than 350 SAP instances on Amazon Web Services public. Its specialization in both markets is evidenced by the fact that the company has 72 SAP and AWS certifications.

The company has opened a business unit specialized in artificial intelligence and the development of conversational interfaces for companies that want to take advantage of this technology to add differential value to their relationships with customers, employees, suppliers and partners.
